211 POKER

211 Poker is the newest player-to-player poker game in over 25 years and will draw new people to your card rooms. 211 (said as "Two Eleven") has shown excitement in players playing poker that has never been seen before.

This variation of Omaha deals more hands per hour than Omaha and dealers have said it is easier to show-down when betting is finished. This will make your card room more profits and will bring more new players to your gaming facility.

Betting rounds and blinds are exactly like Hold'Em and Omaha. The 3 outstanding features of this game are: the flop is only 2 cards (followed by the turn and river); a 7 low condition when played 'High/Low'; and players must use only any 2 or 3 of their 4 down cards with only any 2 or 3 of the 4 community cards to make their best 5 card high and low hand.

211 is approved for play by the state gaming commissions in Nevada and California and is patent pending.
