### Tunable, Multimode LED Flat Panel Lights

LEDtronics has released its new series of tunable, multimode LED flat panel lights with selectable wattage and white color temperature. The

UL-listed panels feature standby dimming, as well as an adjustable occupancy/daylight sensor.

Available in 1x4, 2x2 and 2x4 ft sizes, the “CT” series of tunable LED flat panel lights are ideal replacements for fluorescent fixtures and tube lights in recessed luminaires. Their ultra slim profile fits seamlessly into standard dropped troffer and parabolic fixtures in most T-bar ceilings to deliver adjustable ambient lighting for interior spaces.

Offering the flexibility to customize wattage in 5 watt increments and adjust color temperature from 3000 Kelvin (warm white) to 5000 Kelvin (pure white), these thin panels have the capability to provide desired ambiance in an industrial or commercial space. Occupancy and ambient light sensing

increase visual comfort and energy savings in offices, retail spaces, hotels, resorts, conferences rooms, classrooms, and healthcare environments.

The Title 24 compliant panels also feature a fully adjustable occupant and daylight sensor, as well as standby dimming level and time period.

The luminaire series can also be surface mounted with optional aluminum surface mounting frames, or ceiling suspended with optional steel wire cables. The LEDtronics “CT” series of tunable and multimode LED flat panel lights come with an unconditional 5-year U.S. factory warranty.

### Surge 22 All-in-One Vertical Mount Kiosk

The 21.5” LED LCD widescreen panel provides optimal touchscreen real estate and visibility, perfect for self-service applications in retail and hospitality environments. It supports both landscape and portrait screen orientations.

The Surge 22 All-In-One comes standard with the latest, state-of-the-art CPU technology. The Intel® Core® i3-6100U 2.3Ghz Skylake CPU is well-prepared to handle high volume, heavy use, and power-hungry applications.

The Surge 22 All-In-One is equipped with a rugged fanless design and up to 8GB of RAM ensuring that this all-in-one is ready to handle harsh environments with extreme temperatures and tough use.

The Surge 22 is not only an all-in-one. With bezel removal, it converts to a panel PC offering the perfect fit for applications such as self-service kiosks, slot machines, and wall mounting. It is also compatible with multiple base options, so it can be customized to fit any space large enough to show off the impressive, 22” Projective Capacitive touchscreen.

The Surge 22 All-In-One touchscreen POS offers a variety of integrated POS peripherals including: MSR USB with an encrypted option available, Wireless LAN, 2D barcode imager, camera, and wall-mount option. ♣
