

"Now more than ever, operators are looking for ways to increase player distancing for comfort and safety"

THE VAULT

The Vault has continued to show that Everi premium product brings new features "everi-time", new designs, and **increased performance that we can depend on**. Some of the latest added benefits we realized with the Arena cabinet was in the banked design. Now more than ever, operators are looking for ways to increase player distancing for comfort and safety, but minimizing the footprint of our games. The Vault product does that perfectly, it is the smallest carousel design, it doesn't require bases, it brings premium content, drink wedges, lighting, signage, it's a smaller form factor, and best of all it performs above average."
