Healthy Play Line of Upholsteries

Gary Platt Manufacturing is now offering its new "Healthy Play" line of bleach-cleanable upholstery for all new orders. Gary Platt customers can also order the new upholstery for reupholstering existing casino seating, further enhancing player comfort and safety.

Gary Platt's new Healthy Play line of upholsteries does not support microbiological growth and is also inherently anti-fungal and anti-mildew. Additionally, the upholsteries contain no anti-bacterial chemicals and meet stringent VOC emission standards, which can result in overall healthier indoor air quality.

The durable Healthy Play antimicrobial, antifungal upholsteries come in three different varieties and textures with a total of 42 different colors in the collection, making customization easy. Shine is the first line of upholsteries in the Healthy Play series, with 16 colors and a 100% vinyl composition that is both durable and soft. Next is Fresh with 13 colors, a Urethane composition and a classic texture that is both convenient and classic. To complete the Healthy Play collection is Pure with 13 colors, Urethane composition and a soft, supple, shiny texture that pairs perfectly with any environment.

The Healthy Play line of upholsteries is the latest step Gary Platt has taken in response to the coronavirus crisis. Gary Platt also offers 100 percent cotton, washable and reusable face masks, handcrafted with the same unsurpassed quality that embodies the Gary Platt brand.

T5 Tube Bulb

LEDtronics recently announced new color additions to their industry-leading offerings of intermediate-based LED bulbs. The new high-lumen LED T5 Tube Bulbs are now available in any combination of multiple base selections and emitted light colors, and are the ideal replacements for old technology incandescents.

In addition to the 6000K clear model with pure white illumination, the T5 compact bulb series now includes various LED and polycarbonate lens color choices – Aqua Green (519nm), Super Red (632nm), Pure Blue (455nm) and Amber Yellow (612nm).

They are featured in a nickel-plated brass Ba15D 15mm double-contact bipolar bayonet base. However, they are available in any combination of any color with any of our other base options as well – Ba15S 15mm single-contact bayonet, E12 12mm candelabra screw, E14 14mm European screw, and E17 17mm intermediate screw.
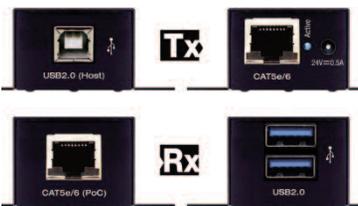

The design of the LED16T5 series allows for quick installations, and is ideal for enclosed fixtures and tight spaces. They are a perfect fit in applications such as machine status indicator bulbs, accent and decorative lighting, industrial panels, automotive bulbs, appliance bulbs as well as chandeliers.

The compact T5 tube bulbs are rated for input voltage of 10~30 VDC, and provide an omnidirectional 360-degree, no-shadow beam pattern. As compared to incandescents, these LED bulbs provide sharper, higher-intensity illumination, better visibility and uniform lighting.

KD-XUSB2

The KD-XUSB2 is a USB 2.0 transmitter and receiver Extender Kit. The Rx features built-in 2 port USB Hub, power over CAT. This product extends USB signals up to 50m/164ft using CAT5e/6 cable. Installation of the KD-XUSB2 is fast and straightforward providing ease of integration in conference rooms, classrooms, business offices, and connected homes. No USB driver software is necessary, making it immediately compatible with Windows, Mac, and Linux machines. The compact size and built-in L bracket chassis design make mounting ideal at tables, desks, or walls. Supporting low, full, and high data transfer speeds up to 480Mbps, the KD-XUSB2 enables host laptops, computers, smart TVs, and appliances to connect with devices such as web cams, keyboard and mouse, hard drives, printers and scanners, USB microphones, touchscreen displays, conferencing DSPs, and more. The transmitter features one USB-B connection and the receiver has two USB-A ports which may also connect to a USB hub for up to 15 supported devices. It is backward compatible and supports USB versions 1.1 thru 2.0. It supports up to 15 connect USB devices with USB hub connected to Rx unit.   ♣
